

Welcome to Bushara Island!

This list reflects all the birds that have been reliably reported on Lake Bunyonyi. Birds which have been seen on Bushara Island are indicated in bold print.

The bird names and identification numbers are those used in the Collins guide by van Perlo (1995).

The likelihood of encountering a particular bird species has been indicated as either: A) common and likely to be observed in a two to three day visit; and B) uncommon.
